

### Mission Insurance Overview

Spaceflight's standard service does not typically include insurance specific to your individual satellite or mission. However, together with its insurance partners, Spaceflight can help arrange additional insurance for your satellite and mission.

Additionally, Spaceflight can provide guidance on:

- launch risk guarantee insurance
- transportation insurance
- on-orbit insurance

Typically, coverage will be specific to the launch vehicle, the country, the specifics on the cost of your satellite and expected revenue of your satellite once on orbit.
